OVERVIEW 2018

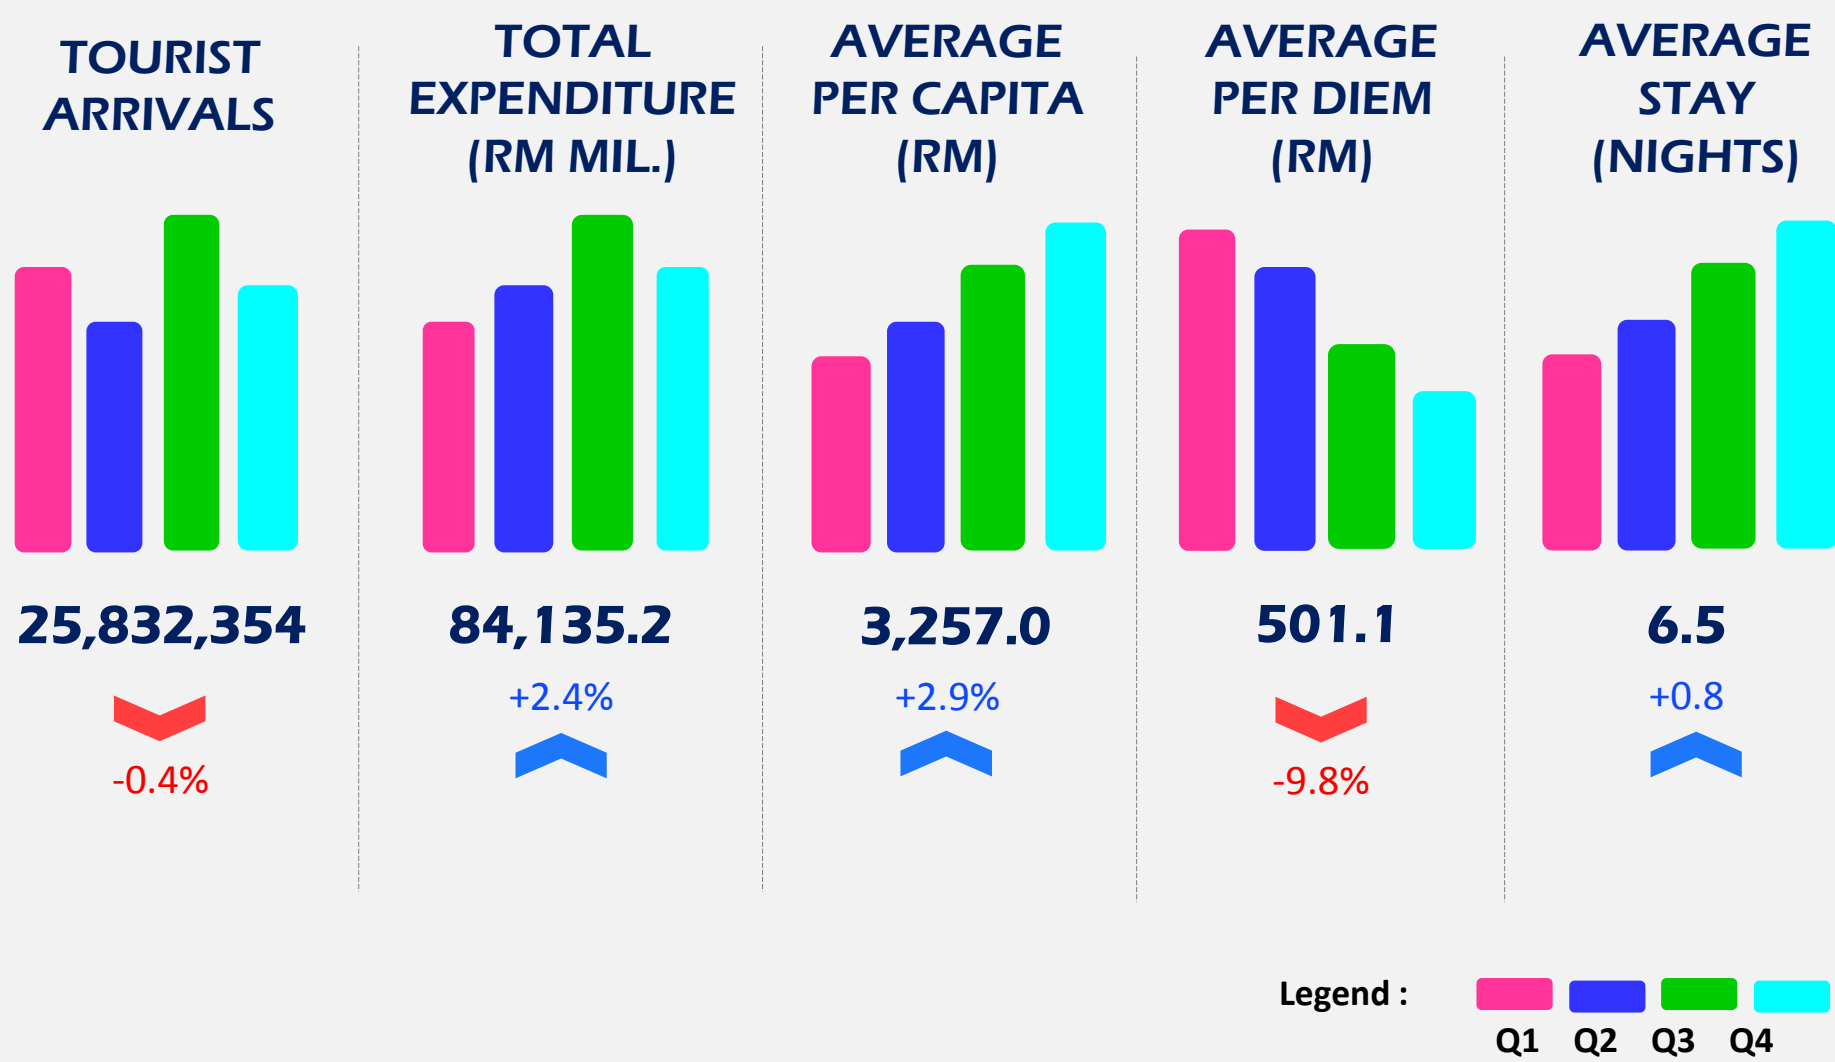

EXECUTIVE SUMMARY

Malaysia welcomed **25.83 million** foreign tourists in 2018, a decrease of -0.4% compared to 2017. Major markets such as Singapore and Brunei led to the downtrend. However, the sturdy growth of other markets such as Indonesia, China, Thailand, South Korea, and India minimized the overall decline.

Tourist Expenditure rose by +2.4% to **RM84.1 billion**. The increase was due to strong growth in Per Capita Expenditure. On average, each tourist spent **RM3,257.0** per trip, an increase of +2.9% compared to the previous year. Shopping, Accommodation and Food & Beverages contributed to the positive growth.

Foreign tourists stayed **6.5 nights** or 0.8 nights longer than the previous year. Tourists from West Asia such as Saudi Arabia, Kuwait and United Arab Emirates as well as European countries such as United Kingdom, Denmark and Netherlands stayed longer than tourists from other regions.

DEFINITION

CLASSIFICATION OF VISITORS, TOURISTS & EXCURSIONIST:

Classification is by Country of Nationality (started in 2012 while years before classified by Country of Residence).

EXCURSIONIST (OR SAME DAY VISITOR):

A visitor (inbound) is classified as a same-day visitor (or excursionist) if his/her trip does not include an overnight stay.

Tourist + Excursionist = Visitor

VISITOR:

A visitor is a traveller taking a trip to a main destination outside his/her usual environment, for less than a year, for any main purpose (business, leisure or other personal purpose) other than to be employed by a resident entity in the country or place visited.

AVERAGE PER CAPITA EXPENDITURE:

Refer to expenditure per person per trip. This is computed by dividing the total expenditure (tourist receipts) by total number of tourists (tourist arrivals).

AVERAGE PER DIEM EXPENDITURE:

Refer to expenditure per person per day. This is computed by dividing the average per capita expenditure by the average length of stay.

TOURIST (OR OVERNIGHT STAY):

A visitor (inbound) is classified as a tourist (or overnight visitor), if his/her trip includes an overnight stay.

AVERAGE LENGTH OF STAY:

Refer to average duration of stay per trip. Computed by dividing the actual duration of stay of all tourists by total number of arrivals.
