DEFINITION

CLASSIFICATION OF VISITORS, TOURISTS & EXCURSIONIST:

Classification is by Country of Nationality since 2012. Prior to 2012, classification was by Country of Residence.

EXCURSIONIST (OR SAME DAY VISITOR):

A visitor (inbound) is classified as a same-day visitor (or excursionist) if his/her trip does not include an overnight stay.

Tourist + Excursionist = Visitor

VISITOR:

A visitor is a traveller taking a trip to a main destination outside his/her usual environment, for less than a year, for any main purpose (business, leisure or other personal purpose) other than to be employed by a resident entity in the country or place visited.

AVERAGE PER CAPITA EXPENDITURE:

Refers to expenditure per person per trip. This is computed by dividing the total expenditure (tourist receipts) by total number of tourists (tourist arrivals).

AVERAGE PER DIEM EXPENDITURE:

Refers to expenditure per person per day. This is computed by dividing the average per capita expenditure by the average length of stay.

TOURIST (OR OVERNIGHT STAY):

A visitor (inbound) is classified as a tourist (or overnight visitor), if his/her trip includes an overnight stay.

AVERAGE LENGTH OF STAY:

Refers to average duration of stay per trip. Computed by dividing the actual duration of stay of all tourists by total number of arrivals.

METHODOLOGY

TOURIST ARRIVALS:

Source: Immigration Department of Malaysia.

DEPARTING VISITOR SURVEY:

Face-to-face interviews were conducted with 50,000 international tourists as they were departing from :

- Kuala Lumpur International Airport, Sepang
- Kuala Lumpur International Airport 2, Sepang
- Bayan lepas International Airport, Penang
- Langkawi International Airport, Kedah
- Kuching International Airport, Sarawak
- Kota Kinabalu International Airport, Sabah

- Bangunan Sultan Iskandar, Johor
- Bukit Kayu Hitam Immigration Complex, Kedah
- Pagoh Rest Area, North South Highway, Johor
- Sg.Tujuh Immigration Complex, Miri, Sarawak
- ICQS Melaka
- Port of Stulang Laut, Johor
- Labuan Jetty, Labuan

Disproportionate random sampling was employed: i.e. respondents were selected based on country of nationality and mode of transport. Smaller markets were sampled disproportionately higher for more reliable and accurate cross tabulations. In view of the disproportionate random sample, the survey data was weighted.
